

Hi Future Sponsor,

The Wylie East Solar Car team exists to encourage the development of students interest in STEM and solar energy. They work to perfect their engineering, manufacturing, CAD, and welding skills on a daily basis. The team spends all year building and working on the solar car before competition in the summer. For the last 5 years in a row, the solar car team has placed 2nd in the Veteran Classic division. Last year they won the first and third day of racing.

In July 2023, the solar car team competed in the Solar Car Challenge with many other high school teams around the United States. This national race started at Texas Motor Speedway in Ft. Worth, TX and ended in Palmdale, CA. As the solar car raced across the country, they drove through multiple cities stopping for interviews, presentations, and media coverage. Unfortunately, on day 3 of an 8 day race, the race was cancelled due to an outbreak of Covid within the race staff.

In 2024 the challenge is located at Texas Motor Speedway, to be successful the solar car team needs YOU! By contributing monetary support, the solar car team will be able to purchase necessary materials, parts, and tools to improve the solar car for their upcoming competition; in return, we offer several benefits, including advertising space on the solar car itself. See the attached packet for more info on financial support.

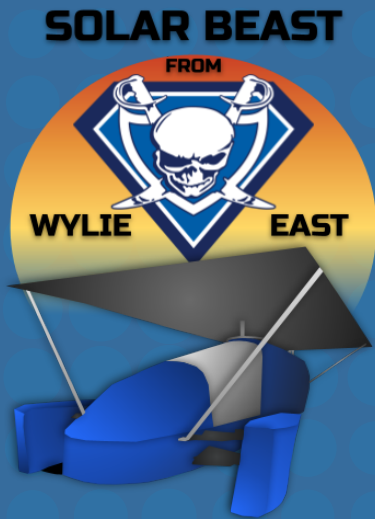

Over the last 10 years the Wylie community has played an important role in the success of this incredible program. Would you consider helping bring home a National Solar Car Title to Wylie, TX?

If you have questions, please contact Matthew Karlsen at Matthew.Karlsen@wylieisd.net. All of us at Wylie ISD want to thank you in advance for your consideration.

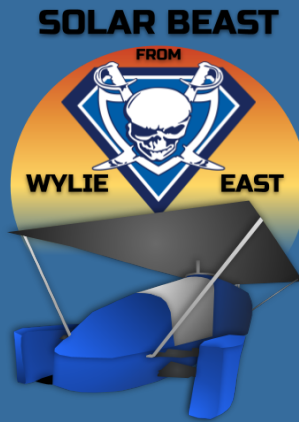

Sincerely,

The Wylie East Solar Car Team

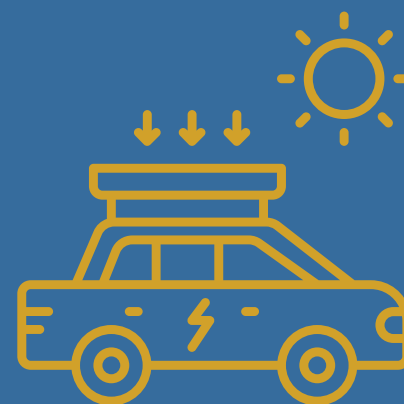

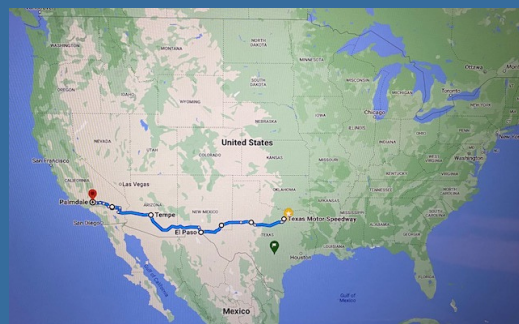

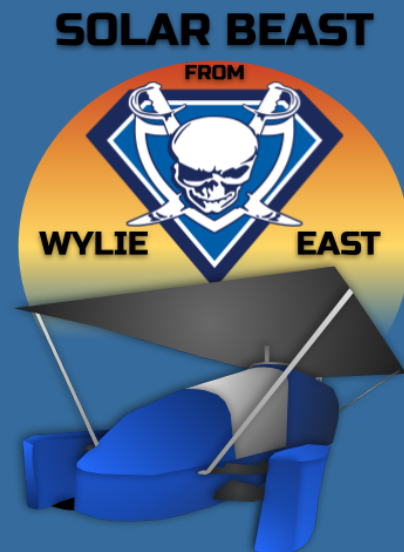

MEET OUR TEAM

THE DOLLARS AND CENTS OF RUNNING A SOLAR CAR PROGRAM
